SUMMARY

Resourceful Fullstack Engineer with experience in React, Next.js, and FastAPI, skilled at translating Figma designs into production-ready components and integrating REST APIs. Proven ability to collaborate in agile teams, communicate with client stakeholders, and independently resolve integration issues. Seeking to leverage frontend and backend expertise to contribute to innovative projects and drive value at a forward-thinking company.

EXPERIENCE

Junior Fullstack Software Engineer | Oaktree Global Innovations

Jun 2025 – Aug 2026 | Remote

- Initially served as the **sole frontend developer for PREDIKTA**, completely rebranding the platform based on Netopia AI's UI/UX team designs and translating Figma designs into production-ready components, interfaces, and pages.
- Integrated **REST APIs and backend services** for each feature, connecting the React/Next.js frontend with **FastAPI** while independently testing integrations and resolving issues.
- Work directly with client stakeholders: translate requirements into functional features, triage **UAT feedback**, and ship fixes against a client-driven Gantt chart timeline.
- Collaborate in a 3–5 person agile team; **promoted from intern to full-time** based on internship performance.

Fullstack Software Engineer Intern | Oaktree Global Innovations

Mar 2025 – May 2025 | Remote

- Built and enhanced PREDIKTA features using React, Next.js, TypeScript, and FastAPI while following Figma-based UI/UX specifications.
- Built TaskFlow, a full-stack task management application with CRUD operations, authentication, session handling, and PostgreSQL.

Data Entry Clerk (Work Immersion) | Nelpa Lifesciences Inc.

Feb 2021 – Mar 2021 | Remote

- Transcribed medical documents from PDFs and images into Microsoft Word, ensuring the preservation of original formatting. Maintained accuracy and consistency in document structure and layout, while developing fast and precise typing skills to handle high-volume data entry tasks efficiently.

PROJECTS

BLACK ROSE — GAMING & ESPORTS COMMUNITY PLATFORM

Jul 2026 – Present | Volunteer

- Built and deployed a gaming and esports community platform led by Alodia Gosiengfiao, featuring Discord authentication, ROSE role-based access, user profiles, and game discovery.
- Developed team and roster management, tournament registration, and a Hall of Champions showcasing tournament winners.
- Built an admin console with tournament management, Single Elimination, Double Elimination, and Swiss brackets, game management, and audit logging, supporting events including an officially Riot Games partnered VALORANT tournament.

Live Link: <https://blackrose.asia/>

Stack: React 19, TanStack Start, Supabase (SQL + RLS), TypeScript, Tailwind CSS, Capacitor

BLOKISLE — TIME-BLOCKING PRODUCTIVITY PLANNER

Oct 2026 | Personal Project

- Designed, built, and deployed a planner for organizing days into time blocks, with per-block checklists, daily objectives, reminders, and Pomodoro or continuous focus sessions.
- Created a schedule-aware 3D Studio in Three.js, where an avatar's activity responds to the user's current time block.
- Implemented device-local planning with optional Google sign-in and Firebase sync, plus optional two-way Google Calendar sync and an Android app.

Live Link: <https://blokisle.vercel.app/>

Stack: React, TypeScript, Three.js, Firebase Auth and Firestore, Cloudflare Workers, Google Calendar API, Capacitor, Vercel

FREELANCE CLIENT PORTFOLIO WEBSITE

Aug 2026

- Delivered a custom portfolio site for an individual client end to end — translated their design direction and content requirements into a production build with a project showcase and integrated PDF/video viewers.

Stack: React 19, TanStack Start/Router, TypeScript, Tailwind CSS, EmailJS

SKILLS

Frontend: React.js, Next.js, TanStack Start, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Three.js, Figma to Code

Backend & Database: FastAPI (Python), PostgreSQL, MongoDB, Supabase, Firebase Firestore, Cloudflare Workers

APIs & Authentication: RESTful APIs, API Integration, JWT Authentication, Discord OAuth 2.0, Discord API, Firebase Authentication, Google Calendar API

Development Tools: Git/GitHub, VS Code, Docker, Capacitor

Development Practices: Agile/Scrum, Quality Assurance, Team Collaboration, Problem Solving

Professional Skills: Communication, Adaptability, Fast Learning, Time Management

EDUCATION

Technological Institute of the Philippines — Manila
Bachelor of Science in Information Technology
2021-2025
